

Linked Open Data Science Service Project Presentation

Prof. Eero Hyvönen
Aalto University

Semantic Computing Research Group (SeCo)

<http://www.seco.tkk.fi/>

Outline

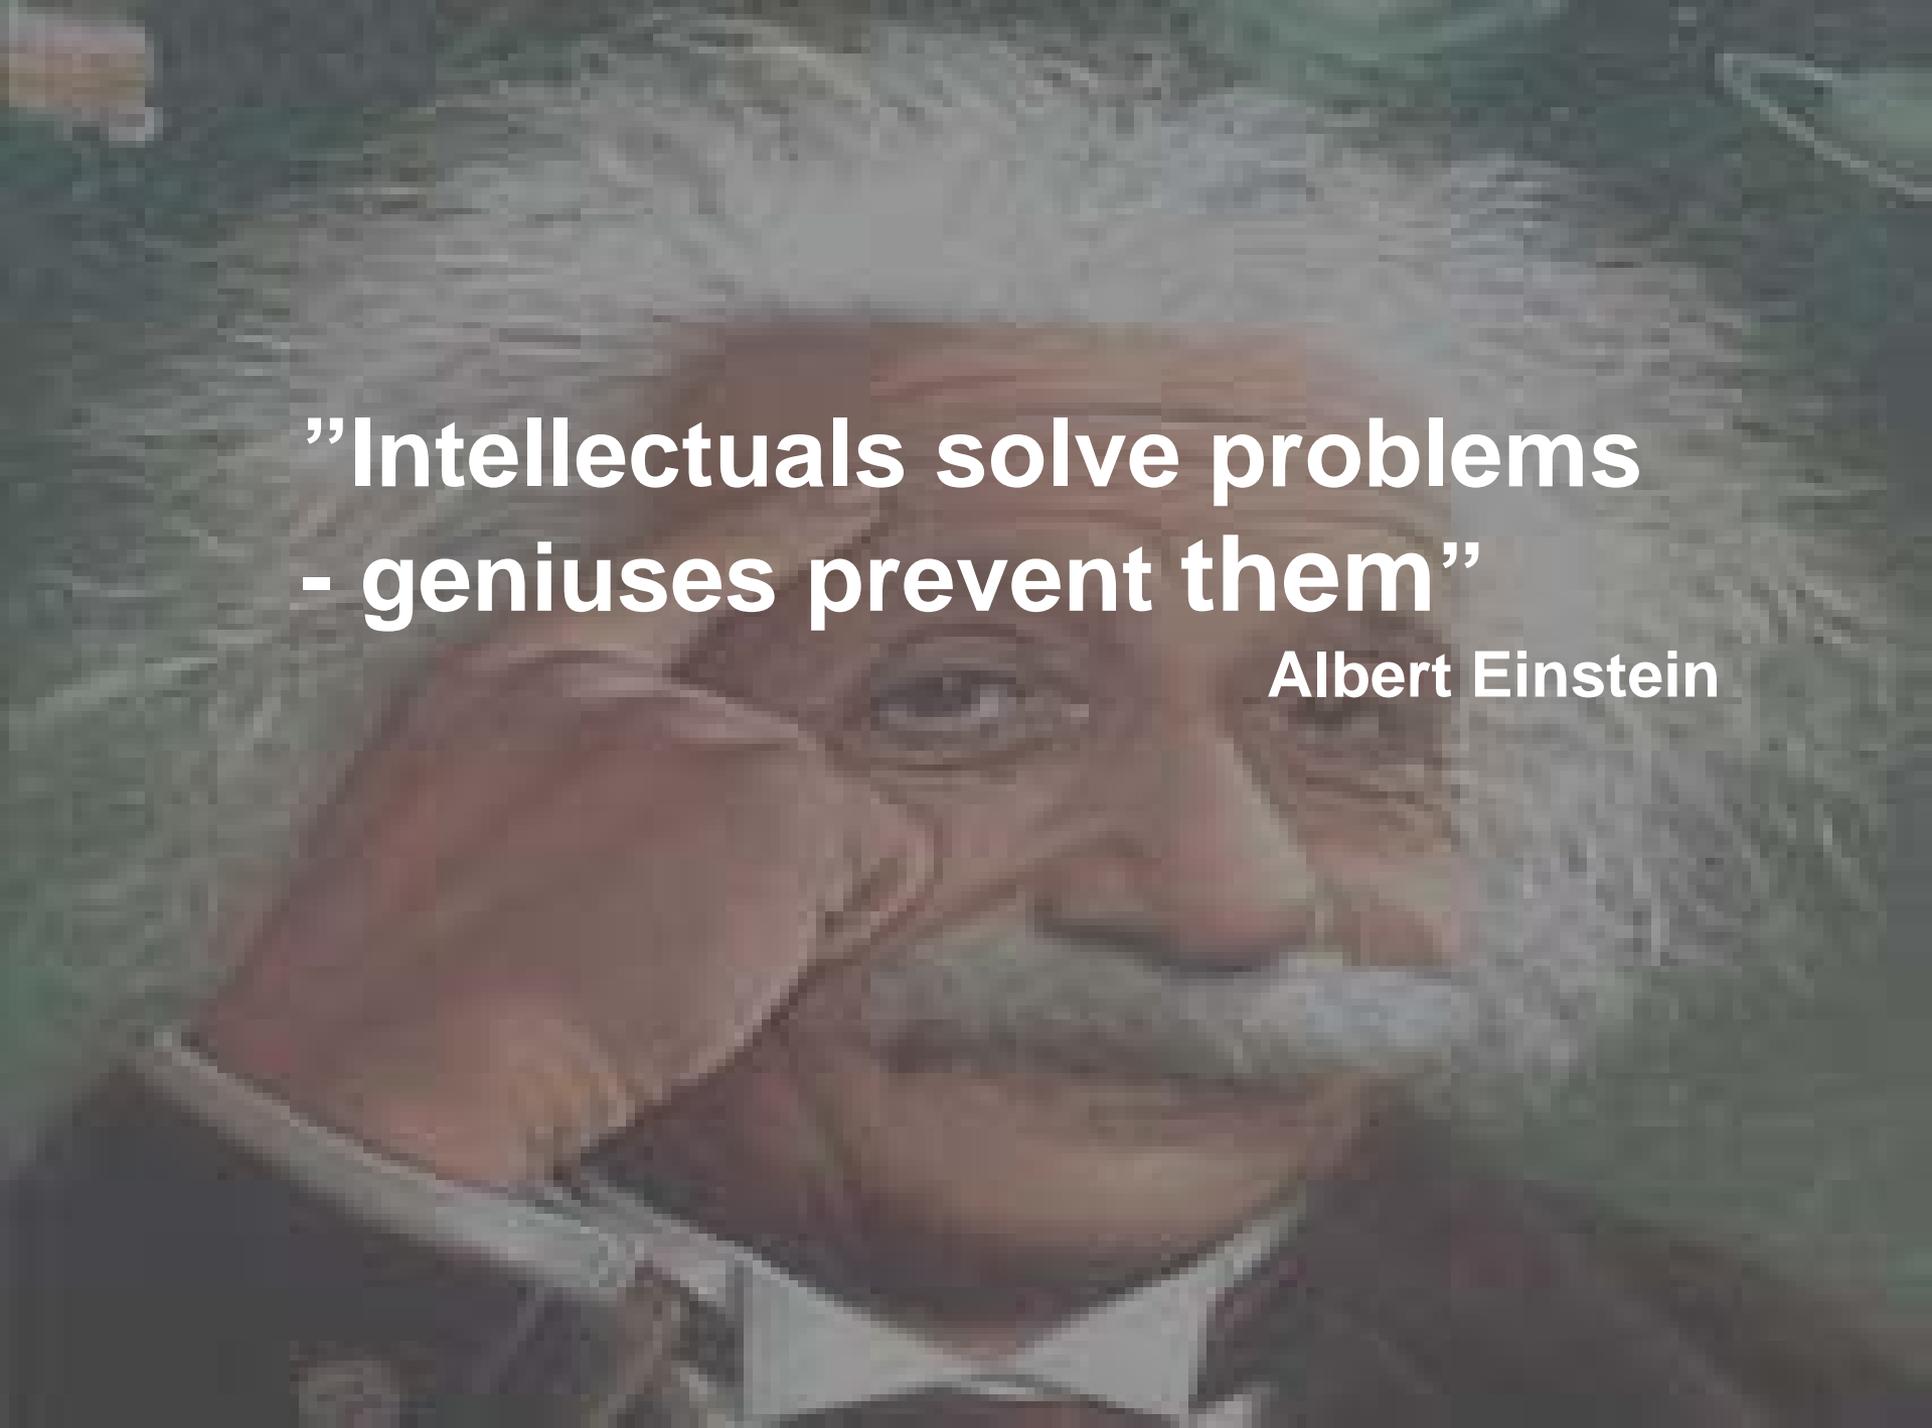

- Vision
- Goals

Vision

Open your data so that it links with the others' data!

1. Everybody's **data is enriched** for "free"
2. Redundant **work is minimized** by collaboration
3. **Work can be shared** in better ways
4. **Data can be reused** in different applications

**Use Shared Infrastructure to
Prevent Data Linking Problems!**

**”Intellectuals solve problems
- geniuses prevent them”**

Albert Einstein

Preventing Problems in Advance by Collaboration (and fixing problems already there)

- Sharing **Ontologies as services**
- Sharing **Metadata Schemas as services**
- Sharing **Linked Open Data as services**

Goals

Goals

- **Linked Open Data (LOD) Service for Researchers**
- Interactive **Learning Materials** about Publishing LOD
- **Pilot Case Studies**

Research Problems Addressed

- Data Linking and Fusion
- Data Quality
- Data Analysis and Visualization
- Knowledge Discovery

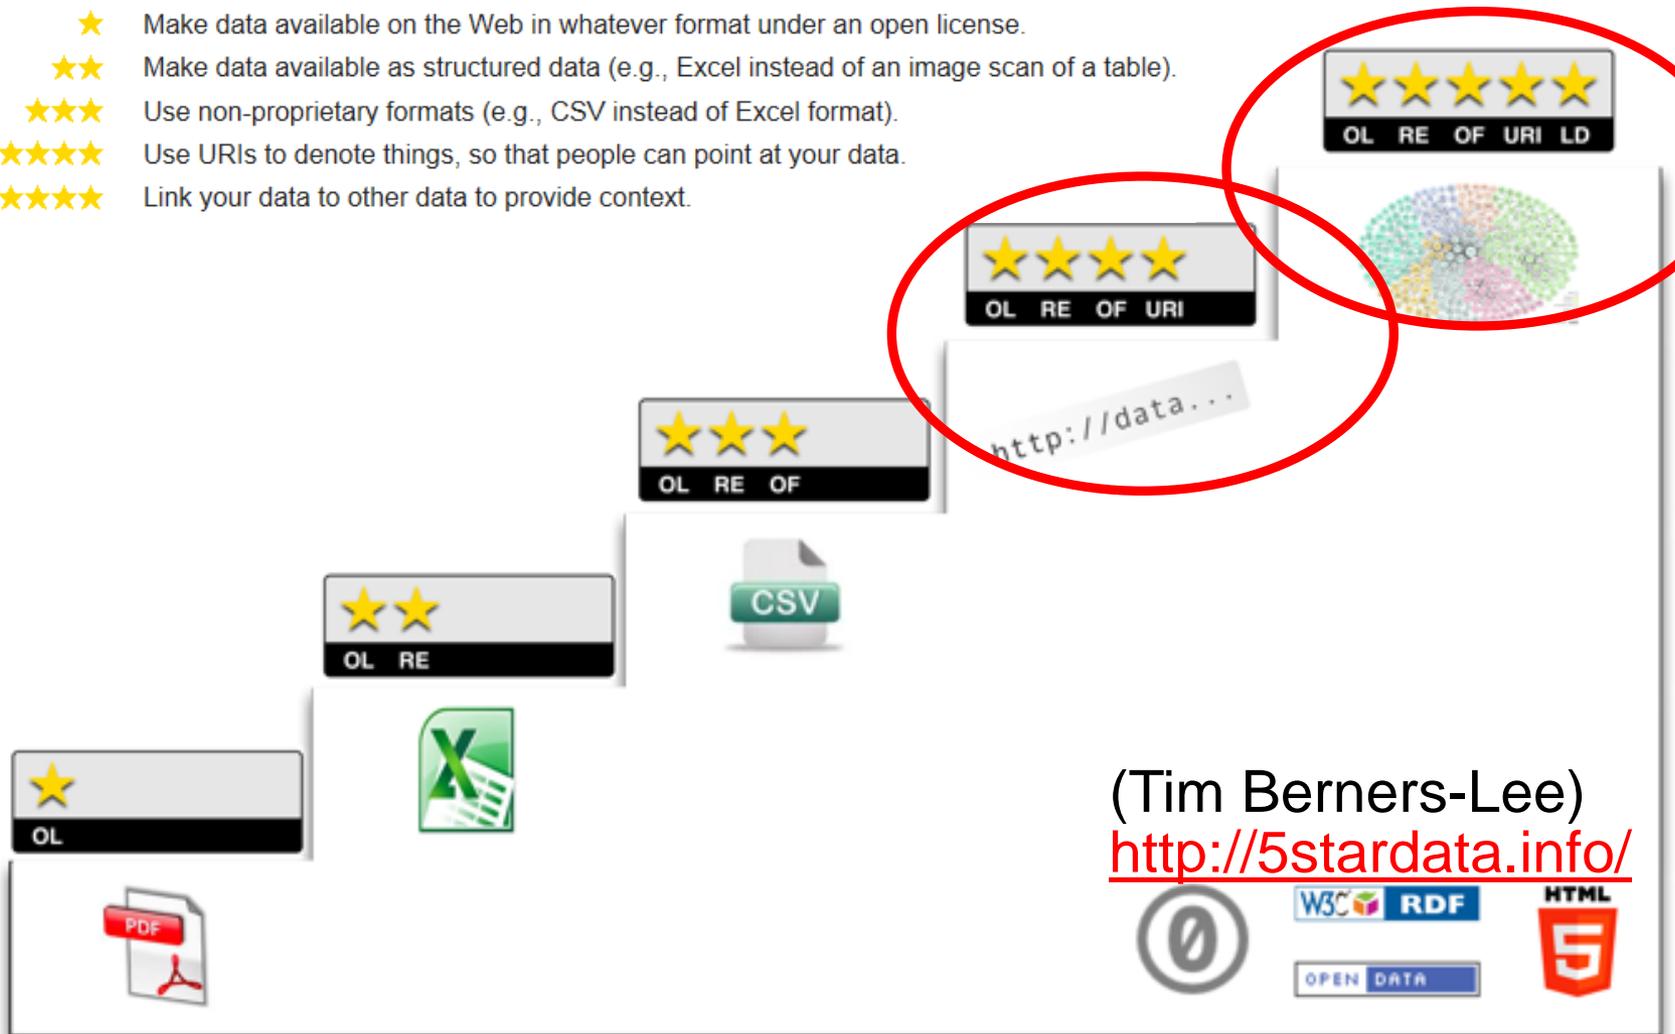

Goal 1

LOD Service for Researchers

How to Publish Linked Data?

5-star Linked Data Model

- ★ Make data available on the Web in whatever format under an open license.
- ★★ Make data available as structured data (e.g., Excel instead of an image scan of a table).
- ★★★ Use non-proprietary formats (e.g., CSV instead of Excel format).
- ★★★★ Use URIs to denote things, so that people can point at your data.
- ★★★★★ Link your data to other data to provide context.

(Tim Berners-Lee)

Our "7-star" Model and LDF.fi Data Hotel

- Goals: enhance re-usability and data quality

7-star Linked Data Service

In addition to these services, we extend the 5-star model into a *7-star model* of our own with two additional requirements:

- ★★★★★★ Provide your data with a schema so that people can understand and re-use your data easily.
- ★★★★★★ Validate your data against the schema so that people can trust the quality of your data.

Linked Data at the LDF.fi portal is published at different quality levels. Our goal is to get any useful data out quickly. The data can be made better by the community and more stars earned later.

API

YOUR NEXT APPLICATION

LOD Service for Researchers

Goal 2

Interactive Learning Materials about Publishing LOD

- English Version Based on Aalto University Materials
 - Semantic Web Course
 - Linked Data MOOC

Goal 3

Pilot Case Studies

- Case 1: Reassembling the Republic of Letters 1500-1800
- Case 2: Finnish WW2 History as Linked Open Data
- Case 3: Statistical Analysis of Ornithological Observations

Reassembling the Republic of Letters 1500-1800

- European Letter Data Related to Enlightenment
 - Studying Europe’s intellectual history
- Finding novel solutions to Digital Humanism research problems based on aggregated semantic data
 - Human problem solving
 - Computational problem solving
 - Hybrid problem solving, e.g., visualizations
- Collaboration with Oxford University and Stanford University
- Collaboration with 30+ European Organizations (EU COST)
 - <http://www.republicofletters.net>
- SeCo leads the Work Group "People and Networks"

Finnish WW2 History as Linked Open Data

WarSampo

**Finnish War History 1939-1945
as Linked Open Data**

<http://www.sotasampo.fi/>

Supporting War History Research with Linked Open Datasets

- War Casualty Databases (90 000)
 - National Archives
- War Diaries (23 000)
 - National Archives
- Photographs and videos (160 000)
 - Military Museum, Finnish Defence Forces
- Kansa taisteli Magazine articles (3 600)
 - Bonniers, Association for Military History in Finland
- Karelia maps and places (30 000)
 - National Survey of Finland
- Elävä arkisto (?)
 - YLE Ltd

Statistical Analysis of Ornithological Observations

- Based on Observational Data at Halias Station
 - 30-year data series of systematic bird observations
 - 30-year data series of weather data
 - Ornithological ontologies
- Joint work with Museum of Natural History and Tringa
