CARTE DES COURONES DU NORD
1788

J. A. Dezauche published this 1788 version of the northern part of De L'Isle's two-piece map of Scandinavia which deviates from the original by for instance its colouring.

Guillaume De L'Isle (1675-1726) was a French geographer and cartographer. He became acquainted with knowledge and skills of the astronomers of France and adapted their doctrines for his drawing of maps. L'Isle was thoroughly devoted to his work and detailed his maps according to new measurements and information.

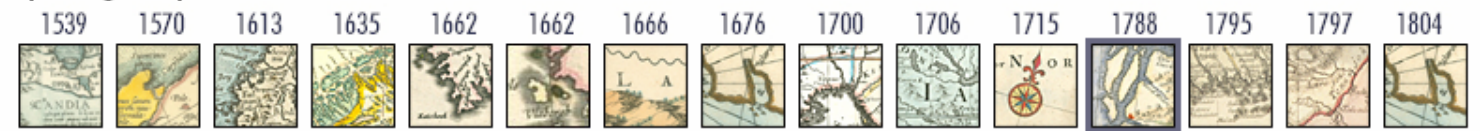

The two-piece map of Scandinavia is remarkable in respect to its clarity, elegance and manner of representation.

Pushing down the left button of the mouse and moving the cursor over the image you can move the map image.
